## DETAILED ACTION

### *Claim Rejections - 35 USC § 101*

1. 35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

2. Claim 27 is rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter.

Claim 27 is directed to stored information on a medium. Since the information does not provide any functional relationship to the medium so that the stored information can be read out and control the medium to access the stored information, or impart with software or hardware structural components to provide certain function that is processed by a computer, the stored information does not make it statutory. See MPEP2100.

### *Double Patenting*

3. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

4. Claims 27-30 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1,3,5 and 7 of U.S. Patent No. 6,389,222. in view of Saeki et al .

The difference between claims 27-30 of the present application and claims 1,3,5 and 7 of U.S. Patent No. 6,389,222 is that claims 27-30 of the present application additionally recite that the still picture information and control information is recorded in a first area and control information is recorded in a second area of the medium .

However, it is noted that using a control means that enable of recording the picture information in a first area and control information in a second area and reproducing the picture information and control information from the medium is well known in the art as taught by Saeki. Therefore, it would have been obvious to one of ordinary skill in the art to modify claims 1,3,5 and 7 of U.S. Patent No. 6,389,222 with Saeki by providing a processing means as taught by Saeki with the apparatus of claims 13,5 and 7 of U.S. Patent No. 6,389,222 to record still picture information in first area and control information in a second area in order to easily control, manage and access of the still picture information and control information and to produce claims 27-30 of the present application .
